DETAILED ACTION

Response to Arguments

Applicant's arguments filed on July 22nd, 2004 have been fully considered but they are not persuasive. The applicant argues that Soubry and Soubry combined with Kirkpatrick fail to teach a non-Newtonian fluid disposed within the housing to provide a frictional force on the spool and retard rotation of the spool. The examiner disagrees. Soubry uses dimethyl siloxane which is a known non-Newtonian fluid to provide a frictional force on the spool and retard rotation of the spool.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Kirkpatrick discloses the applicant's invention as claimed with the exception of providing whereas Soubry does provide a reel and non-Newtonian fluid in the housing to limit the movement of the device. Therefore it would have been obvious to modify Kirkpatrick's invention by providing a friction-limiting device of Soubry having a non-Newtonian fluid in order to provide frictional force on a spool without being easily rubbed or worn away by friction.

In conclusion claims 1-3 and 6-10 are still rejected under 35 U.S.C. 102(b) as being anticipated by Soubry as applied in the previous office action dating back to March 1st, 2004. Claims 1-15 and 17 are still rejected under 35 U.S.C. 103(a) as being unpatentable over

Art Unit: 3743

Kirkpatrick et al. in view of Soubry as applied in the previous office action dating back to March 1st, 2004.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
